@pamellaherpio

The choices we make in life can lead us to experiences that dissolve the perception of time and space.

The origin of everything, the diverse cultures and traditions across the planet, and especially those images, moments, and experiences that connect us, create a revolutionary alchemy resulting in the expansion of the mind and heart.

Transformations can be challenging, but they bring forth the strength and honor of humanity to protect ancient traditions. This resistance, resilience, and love for the land resonate more strongly every day, helping us understand their importance in today's world.

Nature, the purity of hearts, simplicity, communities, and kindness need to be cultivated and expanded within ourselves, throughout the planet, and consequently, throughout our solar system.

This exhibition aims to showcase the energy of the communities I visited over the past 15 years of exploration, through photographic records that capture not only the transformations of the world but also my own. Rituals and experiences that opened my consciousness, teaching me how to help transform the simple, the intangible, the traditions, and everything I observed into the true gold of a nation.

Although I have traveled to 34 countries, what resonates most deeply in my heart now is the desire to show the world the true gold of Brazil:
Our Culture and Nature.

These images are exclusive, accompanied by certificates, and 15% of the sales will support the communities I visited and reforestation efforts in their regions.

**With gratitude,
Pamella Herpio**
